**EVENING OF WINE, FOOD AND MUSIC WILL BENEFIT
MULTIPLE SCLEROSIS RESEARCH**

*Local MS researcher will take the stage for a live performance with
members of his cover band, Fringe Field*

(MADISON, WISCONSIN) – An evening of fine wine, food and music will be held September 26 from 6 to 8:30 p.m. at Madison’s Children’s Museum, 100 N. Hamilton St. Called “On the Move Madison,” the fundraising event benefitting multiple sclerosis-related research will include a sampling of acclaimed Madison restaurants, a silent auction and a short MS research update by Aaron Field, MD, PhD, in addition to his performance alongside members of his band, [Fringe Field](#).

Dr. Field is an associate professor in the Department of Radiology at the University of Wisconsin School of Medicine and Public Health, and Director of the Clinical Neuroradiology Fellowship Program for UW medical students. A world renowned expert in MRI scans, he is developing new methods to increase the sensitivity of scans to detect MS. He also plays guitar and provides lead vocals for the band, which is named for the magnetic field surrounding of a magnet.

Admission is \$50 per person and must be purchased in advance of the event. Seating will be limited. Anyone interested in attending should contact Jordan Barclay at jordan.barclay@nmss.org or 262-369-4404 to reserve their space.

The event is sponsored by UW Health, The Coopers Tavern, Capitol Chop House, Strand Associates, Sonic Foundry, Underground Food Collective, Famous Yeti’s Pizza, David and Nancy Walsh Foundation, Baker Tilly, Merchant and M3 Insurance.

Silent auction items will include Packers tickets, fine dining packages and much more.

About Multiple Sclerosis

Multiple sclerosis, an unpredictable, often disabling disease of the central nervous system, interrupts the flow of information within the brain, and between the brain and body. Symptoms range from numbness and tingling to blindness and paralysis. The progress, severity and specific symptoms of MS in any one person cannot yet be predicted, but advances in research and treatment are moving us closer to a world free of MS. Most people with MS are diagnosed between the ages of 20 and 50, with at least two to three times more women than men being diagnosed with the disease. MS affects more than 2.1 million people worldwide. More than 10,000 children, women and men have been diagnosed in Wisconsin, believed to be one of the higher prevalence rates in the nation.

About the National Multiple Sclerosis Society

The National MS Society addresses the challenges of each person affected by MS. To fulfill this mission, the Society funds cutting-edge research, drives change through advocacy, facilitates professional education, collaborates with MS organizations around the world, and provides programs and services designed to help people with MS and their families move forward with their lives. In 2012 alone, the Society invested \$43 million to support 350 research projects around the world while providing programs and services that assisted more than one million people. The Society is dedicated to achieving a world free of MS. Join the movement at www.wisMS.org or by calling 262-369-4400 or 800-242-3358.

Early and ongoing treatment with an FDA-approved therapy can make a difference for people with multiple sclerosis. Learn about your options by talking to your health care professional and contacting the National MS Society at nationalMSSociety.org or 1-800-344-4867 (1-800-FIGHT-MS).
