

MS CLINICAL TRIALS RELATED TO WELLNESS, REHABILITATION AND/OR SYMPTOM IMPROVEMENT

Updated August 2018

This chart is based solely on information provided on the ClinicalTrials.org Website, and is organized by intervention:

COG REHAB – a combination of restorative and compensatory activities designed to improve cognitive function

COMP/ALT – interventions considered to be outside the realm of conventional medicine

DIET/SUPPL – specific diets or supplements

EXERCISE – bodily activity

MED – medical therapy, including medications and medical procedures

REHAB – rehabilitation intervention
