Manager Implementation & Engagement
Today’s Time

• **NEWS:** Going digital through December 31st
• We are here to support you! - New support email: peerconnections@nmss.org
• Connections Program Volunteer Website: http://nationalmssociety.org/ConnectionsVolunteers
Bi-Weekly Ongoing Drop In Call Dates

- November 5\textsuperscript{th}
- November 19\textsuperscript{th}
- December 3\textsuperscript{rd}
- December 17\textsuperscript{th}
Support for Leaders and Groups

- We are going digital through December 31st
- Bi-Weekly Ongoing Drop In Calls
  - Thursdays at noon PST/3EST
  - November 5: COVID Update
  - November 19: Open Enrollment/Marketplace Insurance
- MS Navigator is available to help!
- Find Doctors and Resources Online
COVID-19 and MS

Kathleen Costello
ASSOCIATE VICE PRESIDENT
HEALTHCARE ACCESS
Global Advice Update – Who is at risk?

- People with progressive MS
- Over the age of 60
- Male
- Black people with MS and possibly South Asian people with MS
- People with higher levels of disability
- People with MS and obesity (body mass index of 30 or higher), diabetes or diseases of the heart or lungs
- People taking certain disease modifying therapies for their MS
Global Advice – Disease Modifying Therapies

- People with MS currently taking DMTs continue with their treatment, unless advised to stop by their treating clinician.

- People who develop symptoms of COVID-19 or test positive for the infection discuss their MS therapies with their MS care provider or another health care professional who is familiar with their care.
Global Advice – Disease Modifying Therapies
What to discuss with your MS provider

• MS disease course and activity
• The risks and benefits normally associated with different treatment options
• Additional risks related to COVID-19, such as:
  • older age, obesity, pre-existing lung or cardiovascular disease, progressive MS, higher risk race/ethnicity etc
  • Local current and anticipated future COVID-19 risk
  • Risk of exposure to COVID-19 due to lifestyle
  • Emerging evidence on the potential interaction between some treatments
Global Advice – Disease Modifying Therapies

- Interferons (Avonex, Betaseron, Extavia, Plegridy, Rebif) and glatiramer acetate (Copaxone) are unlikely to impact negatively on COVID-19 severity.

- Dimethyl fumarate (Tecfidera), diroximel fumarate (Vumerity), teriflunomide (Aubagio), fingolimod (Gilenya), natalizumab (Tysabri), ozanimod (Zeposia) and siponimod (Mayzent) do not have an increased risk of more severe COVID-19 symptoms.
Global Advice – Disease Modifying Therapies

• Therapies that target CD20 – ocrelizumab (Ocrevus) and rituximab (Rituxan) – **may** be linked to an increased chance of having a more severe form of COVID-19.

• **However, these therapies should still be considered as an option for treating MS during the pandemic.**

• People with MS who are taking them or ofatumumab (Kesimpta), should be particularly vigilant regarding the advice to reduce their risk of infection.
Global Advice – Disease Modifying Therapies

• More data on the use of alemtuzumab (Lemtrada) and cladribine (Mavenclad) during the COVID-19 pandemic are required to make any assessment of their safety.

• People with MS who are currently taking these therapies and are living in a community with a COVID-19 outbreak should discuss their current lymphocyte counts with their healthcare professional.

• If lymphocyte counts are considered to be low they should self-isolate as much as possible to reduce their risk.
# COVID-19 Vaccine Update

<table>
<thead>
<tr>
<th>Phase 1</th>
<th>Phase 2</th>
<th>Phase 3</th>
<th>Limited</th>
<th>Approved</th>
</tr>
</thead>
<tbody>
<tr>
<td>36</td>
<td>14</td>
<td>11</td>
<td>6</td>
<td>0</td>
</tr>
</tbody>
</table>

- **Vaccines testing safety and dose**
- **Vaccines in expanded safety trials**
- **Vaccines in large-scale efficacy tests**
- **Vaccines approved for early or limited use**
- **Vaccines approved for full use**

Vaccine Research

- **Phase 2/3**
  - BioNTek/Pfizer
  - Astra Zeneca/University of Oxford
    - England, India

- **Phase 3**
  - Moderna/NIH
  - Johnson and Johnson/Beth Israel Deaconess
  - AstraZeneca/University of Oxford
    - Brazil, South Africa, USA
  - Novavax
  - Bharat
Stay safe!!!

- Wear a mask over the nose and mouth
- Wash hands frequently
- Keep sanitizer with you
- Avoid touching your face
- Clean cell phone often
- Social distancing – at least 10 feet
- Avoid gatherings – especially indoors

MS Treatment and Research
Decades of research into MS have built a platform of knowledge now serving as a springboard for continued progress. Join us for a discussion with Jeffrey Cohen, a neurologist from the Mellen Center for Multiple Sclerosis Treatment and Research to hear about MS therapies on the horizon, remyelination, stem cells treatments, and the latest in COVID-19 global advice for those living with MS.

Nov 13
Military Veterans Living with MS: What You Should Know
In commemoration for Veterans Day, join us for a special Ask the MS Expert featuring US Air Force Veteran Karla Clay, who shares her story of experiencing symptoms of MS while on active duty and being diagnosed after leaving the military. Maggie Kazmierski, LSCW, social worker at the Baltimore MS Center of Excellence, will also highlight services available to Veterans living with MS and how to connect to those services within the VA.
